ABOUT ME

In my programming experience, I worked with C / C ++ since 2018 and I am now learning the Vulkan API and the concepts on which it is based; I'm also in the iOS application development field since 2015 and I am currently studying Metal and MoltenVk. The recent assignments, job requests and my course of study have provided me with advanced Full Stack developer skills in SQL, PHP, JS, HTML and server configuration (XAMPP Suite).

I studied and worked for a total of 6 months abroad, in Ireland and the United Kingdom with assignments and studies always aimed to the computer science field with a particular focus on team work, obviously in English, and on technical English. I also add another three months of the C1 English certification course.

I am in the field of CGI since 2018, creating 3D posters, specialised in hyper realism and creation of realistic materials; I have an advanced knowledge of blender and its components and an intermediate knowledge of Final Cut Pro

WORK EXPERIENCE

Database and resolutions dogwatch | Disservice advisor

Accenture [24/07/2022 – 05/09/2022]

City: Naples

Country: Italy

Disservice advisory: if a disservice, front end side mostly, is present, I analyse the issue and pass the obtained pieces of information to the competent team.

Database and resolutions dogwatch: fixing and improving queries; analysing the records from the queries and if there are some errors, fix them if it's my field of competence or pass the error to the competent team.

Full Stack Developer | Java Back End Developer

3F & EDIN [08/05/2022 – 24/07/2022]

City: NA - Napoli

Country: Italy

Server-side programming in Java, Node.JS and SQL; Angular as front-end framework. I've done many projects and services such as a management application for a gym and an ordering application for restaurants.

Full Stack Developer

Pointel - Alilauro [16/09/2021 – 16/04/2022]

City: Napoli

Country: Italy

Server-side programming in PHP, Python and SQL and front end in JavaScript. The project, named internally as Alitrack, aims to monitor and geolocate various types of marine ships.
